Course has good learning value.

The course had a lot of content for a 4-month semester. Either the duration of the semester must be increased or the course content must be capped to meet the 4-month duration.

Well organized course with adequate course material.

Interesting and challenging course

Exceptional course.

The course content was engaging and was covered in a holistic manner as a pre-requisite to more advanced courses.

The course is good

This was a fairly high-intensity course, with a lot of overlap with Real Analysis and Measure Theory. This course attempted to bolster the foundations of Probabilistic Notions and Random Variables from the very ground up. However,sometimes it became cumbersome and a bit confusing being lost in the details rather than appreciating the bigger picture. Also the evaluation was too hectic, with quizzes, assignments, mid-terms, open-quizzes all throughout the semester.

Yes

**good**

**Good and comprehensive teaching which gave me completely new perspective on probability**

**The course is well structured and improves understanding of various concepts**

**The course was very useful**

**Loved the course, it was very detailed and planned course**

**Course was well organized and the content was also very good. The beauty of probability was well covered in this course**

**Course was one of the best course I had taken in IITH.**

**The course had good blend of deep fundamentals and applications (computing probabilities and expectations).**

**Course is well structured and very usefull**

**Well Structured course**

**The course was really helpful.**

**Course provides a nice overview for Probability and Random Variables, But content of the course is rigorous, It would be better if this course is divided into 2 parts(Probability & Random Variables, Stochastic processes) both of 3 credits, As this course requires more time than a normal 3 credit course.**

**A brief exposure to application of the taught topics may be included by moderating in-depth rigour**

**all good**

**Had a great basics for upcoming courses.**

**The most structured course ever. External resources were easily accessible but were never used as the class material and structure was exhaustive and rigorous. This course forces to push your boundaries in a very doable manner.**

**NA**

**The course is fundamental for building background necessary for machine learning courses.**

**Very less emphasis on stochastic processes.**

**Great.**

**The course is very well design by Karthik Sir, covers all the knitty gritty details ranging from algebra to standard topics such as expectations, conditional expectations.**

**Quality of course was good.**

**Course framework is really good. We got to learn a lot of new things.**

**Good.**

**good to learn**

**Really great course with appropriate amount of rigour and enhanced my understanding of probability theory as a whole**

**The best probability course i've studied till now, perfect in all sense**

Remarks

Unique and innovative methods for evaluation helped a lot.

The instructor took lot of interest.

Extremely passionate professor. I am amazed by his style of teaching. Completely enjoyed this course.

One of the best professors, sir puts in a lot of effort to make sure that the students learn the topic with utmost clarity.

No additional feedback for the instructor, apart from continuing the way to work

Surely One of the best faculty in IIT-H

Instructor taught the course extensively covering the nitty gritty of the subject. It was engaging and made it interesting and exhaustive.

It took time for me to adjust to the course.

P.N. Karthik sir taught really well, proving and deriving every convoluted arguments from first principles itself. However, I believe the course was a bit too hectic and hence, most students wouldn't be able to truly appreciate his efforts. The only reason I am in two minds to credit another one of his course is the evaluation policy, which can be a bit too much to balance with other courses running concurrently. But all in all, I really enjoyed his classes and his assignment questions.

N/A

**good**

**one of the excellent teachers I came across**

**The instructor has taken the best efforts possible to teach the students.**

**The instructor was very motivating.**

**Love how prof taught the course**

**Sir has put every effort they could put in this course and I think the result was well seen. I was able to see the probability from a very different perspective which I had never seen before taking this course.**

**The instructor ensured that the fundamentals are very clear. He encouraged thinking on the feet and working out by ourselves. He made the exams challenging enough while giving easy wins and making the course fun with open-quizzes. The amount of effort he has put into the course is really inspiring. The instructor himself is very patient when we approach him for doubts, very dedicated and that is truly inspiring for a student. I am eager to take all his courses and recommend my juniors too.**

**Instructor has put great amount of effort to deliver this beautiful course.**

**Karthik sir put a lot efforts on this course and took more time than actual hours to make best out of this course**

**The instructor's exceptional teaching, way of motivating students, and inspiring guidance make learning a truly fulfill experience.**

**Very excited to take another course with this instructor.**

**It was nice learning experience, Got to know the subject of probability from different perspective.**

**Satisfied with the instructor's efforts behind teaching multiple abstract concepts in limited timeframe**

**all good**

**Very impressive way of teaching i have experienced so far. Completely changed my perspective towards the subject and made me think out of the box. I am very thankful for having such a great faculty and with his constant support and motivation i tried my best to increase my standards.**

**The habit of breaking everything to first principle was built. Mind boggling efforts were made to make it as easy to understand as possible. Even then if doubts were there, remarkable time was given to solve them. The open quiz was really novel and interesting. It fostered group learning even after the open quiz, when the groups were dissolved. Only feedback is that the groups could have been smaller, so that people not involved will have to work as well. Karthik sir is the best instructor ever!**

**Thank you for teaching this course wonderfully.**

**Prof. karthik was extremely professional and taught the course with utmost care and made understanding complex topics as easy as possible.**

**Very good prof**

**I enjoyed the way sir went through the course. Mainly he conducted an open quiz which was very innovative.**

**Karthik Sir teaches very well, leaves no stone unturned in explaining the concepts. Always shares the recording , ppts right after the class. Conducts tutorial sessions every weekend. I will be very happy to take the next course offered by Sir.**

**Instructor possesses extraordinary teaching skills and also the questions in assessments are good.**

**Instructor is very enthusiastic to teach us .He is very motivating and guides anyone who needs help.**

**Nice.**

**good to learn from Karthik Sir. Class Engagement was well taken care of, like the concept of open quiz where we form teams to answer the questions was very unique and should be repeated in further courses.**
